

A representative from Chess Express Ratings will be on site to deliver a presentation.

Tuesday, March 24th, 6:45 to 7:15 pm

CXR is a service providing chess players with personal performance metrics to help track and improve over-the-board play. This is much more than just a rating.

CXR provides many useful statistics so you can know whether you play better in quick games or long ones; how you perform playing the black pieces; how you do with the white pieces; whether you are giving away points to weak opponents.

Do you wither before high-rated opponents? or battle above and beyond statistical expectations. These are your personal "sports stats" that can help you optimize your training. We'll be at the MetroWest Chess Club to answer your questions.

You can visit their site at

Careful, it greets you with an audio message so if you have speakers you may want to turn them off for a minute.
